**“I love building a trust with my patients and seeing their health improve and them flourishing.”**

### **About Caroline Segovia, MSN, FNP-BC, MEDSURG-BC**

Caroline Segovia's passion for advocacy led her to the healthcare profession. “I love building a trust with my patients and seeing their health improve and them flourishing,” she says. She believes in caring for “the whole patient” and enjoys building genuine relationships. “Of course I want to know how you are physically doing, but I also want to know about your family, your pets, your interests,” she explains. She adds, “I feel that seniors are often not listened to and need someone with a caring demeanor to help them open up and feel loved and cared for.” Caroline Segovia specializes in Oncology, in addition to Hematology.

Caroline Segovia can be found enjoying quality time with her husband and son in her free time. She is also an animal lover and has several pets.
